Accomplishments and price list

No. 2023/1 valid from August 1st, 2023

www.bonvinitas.com, which is performing the PIWI INTERNATIONAL WINE CHALLENGE 2023 for PIWI International association in close cooperation, is the great international online wine magazine, which independently carries out its own blind evaluations of wines by neutral testers, too.

Categories and rating system

The wines and sparkling wines are blindly rated by neutral testers on a 100-point system **in five categories**.

[Look our rating system](#)

category 1: lighter dry wines and sparkling wines with less than 9 g/l residual sugar and up to 12% alcohol. When evaluating the bouquet, we weight here freshness and liveliness more heavily and the drinking pleasure on the tongue. Because we are convinced that this is particularly sought after with lighter wines.

category 2: stronger, dry wines and sparkling wines with less than 9 g/l residual sugar and more than 12% alcohol. Here we give more weight to the personality of the wine, the individual and terroir notes as well as the potential for good development in the future, characteristics that are expected of these products.

category 3: half dry and sweeter wines and sparkling wines, each with over 9 g/l of sugar. Here we weight the fruitiness more heavily as well as the probable future, because fruit is primarily expected from a sweeter wine.

category 4: noble sweet wines such as Beerenauslese, Trockenbeerenauslese or ice wines. Here, of course, we weight the fruit even more, especially tropical fruit notes.

category 5: natural and orange wines. Here we give more weight to the distinctiveness, the individual and substantial.
